Mehmet Ali Metin

Petroleum and Natural Gas Engineering · METU, Ankara

mehmetalimetin@yahoo.com LinkedIn GitHub

One or two sentences: what you do and what you are looking for — e.g. “Petroleum engineering student focused on reservoir simulation and underground hydrogen storage, seeking a graduate role in reservoir or drilling engineering from 2027.”

EDUCATION

B.Sc. in Petroleum and Natural Gas Engineering

20XX – 20XX (expected)

Middle East Technical University (METU) · Ankara, Türkiye

Coursework in Reservoir Engineering, Geology, Chemical Engineering, Fluid Transport, and Numerical Methods.

EXPERIENCE

Directional Drilling Summer Intern

August 2025

TP-OTC · Filyos Shorebase Logistics Center

Worked within the Directional Drilling and Measurement department supporting the Sakarya Gas Field project. Gained practical experience in bottom hole assembly (BHA) design, tested MWD/LWD directional drilling tools, and evaluated drilling fluid properties.

Production Department Summer Intern

August 2024

TPAO · Trakya Region

Hands-on experience in production engineering across the process and reservoir teams: routine well maintenance, perforation jobs, surface equipment monitoring, and fluid sampling — bridging academic coursework with real-world petroleum operations.

RESEARCH & PROJECTS

Underground Hydrogen Storage (UHS) Researcher

Month 20XX – Present

Middle East Technical University (METU)

Researcher for the project *“Autonomous Discovery of Geochemical Reactions Occurring in Reservoirs During the Underground Hydrogen Storage by a Neural Network”*. Developing physics-informed neural network (PINN) architectures to accelerate PHREEQC-based 1D advective–reactive transport modeling of geochemical and microbial kinetics.

Analytical Tracer Breakthrough Modeling

Month 20XX

Context — e.g. “Personal project” or “Course project, PETE XXX”

Implemented Sauty’s 1D advection–dispersion model and fracture flow equations for porous and fractured media in modular Python scripts.

SKILLS

Programming & modeling	Python, PHREEQC, physics-informed neural networks (PINNs), numerical methods
Engineering software	Landmark CasingSeat™, StressCheck™, WellPlan™
Field	BHA design, MWD/LWD tools, drilling fluid testing, well control (IWCF Level 1), production operations
Languages	Turkish (native), English (level)

CERTIFICATIONS & TRAINING

Introduction to CasingSeat™, StressCheck™, WellPlan™ — March 2026
Halliburton

Reservoir Modelling Workflows — March 2026
Dr. Arman Darvish Sarvestani

Level 1 Programme — May 2025
International Well Control Forum (IWCF)

Advanced Stimulation Practices Seminar — March 2024
Production Solutions

CS50’s Introduction to Programming with Python — In Progress
HarvardX
